

USEF EXECUTIVE BOARD

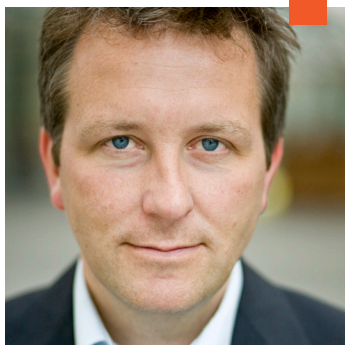

JOHN HODEMAEKERS

John Hodemaekers is the President of the Executive Board of USEF Foundation. He started his career in the mid-eighties of the last century and introduced an integrated approach on developing energy infrastructures in which electricity, natural gas and district heating were optimized. His ambition has always been getting new insights and technologies incorporated in the development of sustainable smart energy systems. As Innovation Manager within Stedin he actively supports the ambitions of Stedin and the Dutch Government for a transition to a more sustainable energy infrastructure by participating in several steering groups and taskforces related to this energy transition.

PETER VAN DEN HEEDE

Peter van den Heede has been a member of the Executive Board of USEF Foundation since 2015. An electro technical engineer, he joined ABB in 2007 and was appointed as general manager for the low voltage product division shortly after. Since 2011 Van den Heede has managed all smart grid related activities in the Benelux region and is responsible for marketing and business development for smart grids for Central Europe. With high involvement in different smart energy related initiatives, Peter van den Heede is amongst the 40 Most Influential People in European Smart Grid according to Metering & Smart Energy International.

JAN VAN OORSCHOT

Jan van Oorschot is Financial Director of USEF Foundation since 2014. He has extensive experience within the energy sector. After finishing his study Information Science at the University of Tilburg, Jan van Oorschot started in 1997 as auditor at Ernst & Young. He moved on to the Telecom industry before switching to the Energy Sector in 2002. Van Oorschot has had several management roles within Liander. At present, he is Director Customer & Market and is part of the Board of Directors of Liander.

FRITS VERHEIJ

Frits Verheij has been involved in USEF from its early start and is a member of the Executive Board of USEF Foundation. He has been active in the renewable energy business since the start of his career in 1987. Prior to joining KEMA (now DNV GL), he worked at the research organization TNO and the Dutch Energy Agency. Currently, Mr Verheij is Director Smart Energy for DNV GL – Energy as well as chairman of the Board of Top consortium on Knowledge & Innovation (TKI) Switch2SmartGrids, as well as a board member of the Global Smart Grid Federation and GreenIT Amsterdam.
